Behzad Kakavand

Web Developer

[JavaScript, React.js, node.js, RESTful APIs, SQL/NoSQL, TDD]

I am a full stack web developer, passionate about coding. Creating something, that people interact with, use and work with to help them in their everyday life, is an art that gives me an amazing feeling.
I got interested in coding when I was an experienced city designer whose innovative approach and problem-solving skills, routinely resulted in delivering high standard service.
I dedicated the last two years to learn to code and gain more experience in web development.
#Work permission: Leave to remain in the UK

PROFESSIONAL EXPERIENCE

Jun 19 - Present

Web Developer

For the last couple of months, I have been working on different projects. These projects gave me the chance to improve my knowledge of backend development and React.js. You can find more about them in my GitHub account.

Sep 18 – May 19

Trainee Web Developer

CODE YOUR FUTURE

This was a full stack course which gave me the chance to work on a range of projects, designing appealing frontend using HTML, CSS, JavaScript and React and creating server-side of applications using node.js.

Feb 16 – Mar 17

UI Designer

FARZIN HOLDING

My responsibilities included producing marketing assets for consumer and industry events and promotions, designing mock-ups for website layout and created final web assets, translation of the UI/UX design wireframes to the actual code to produce visual elements of the application.

2012 – Mar 16

After 4 years as a city designer, in 2016, I started looking for a new challenge which would involve using my attention to details and creativity skills. You can find more about my career in urban designing at my LinkedIn account.

EDUCATIONAL BACKGROUND

2010
BACHELOR OF ARTS IN CITY DESIGN
IKIU, Qazvin, Iran
(Graduated 1:1)

2012
MASTER OF ARTS IN URBAN DESIGN
Tehran University, Tehran, Iran
(Ranked 1st among 5000+ in national entrance exam)

2018
MSc IN INTERNATIONL MANAGEMENT
Teesside University, Middlesbrough, UK
(Graduated with Distinction)

Behzad Kakavand

PROFESSIONAL DEVELOPMENT

Jun 19 – Aug 19

The Web Developer Bootcamp, **udemy.com**,
- Making real web applications
- Manipulating the DOM with vanilla JS and jQuery
- Using Node.JS to write server-side JavaScript
- Creating full-stack web applications from scratch

Aug 19 – Sep 19

React (Hooks, React Router, Redux), **udemy.com**,
- Building powerful, user-friendly and reactive web apps
- Creating full-stack web applications from scratch
- Learning React Hooks & Class-based Components

Sep 18 – May 19

Full Stack Web Development
CODE YOUR FUTURE

During the course, I learned a technology stack that helped me build apps from a simple website to a powerful database-driven web application. The course contains core JavaScript, TDD, backend development using node.js and express, and modern frontend framework, React.js.

PERSONAL QUALITIES

Creative Thinker -
Team Player -
Initiative -
Good Communicator -
Attention to Details -
Deadline Led -

LANGUAGE SKILLS

English(Proficient)

Persian(Native)

Turkish(Upper intermediate)

I am looking for a role where I can improve my understanding in web development. The ideal position is where I can use my knowledge and skills as a web developer with a good chance of learning new skills and gaining more experience.

RECENT PROJECTS

myJobMarket

I created myJobMarket app for “Iranian Community North East” charity. This app helps refugees and newcomers to the UK to find their first job/ project in their new society.

This project, myJobMarket, has two types of users. Group 1 are people who create job adverts on this application. Group 2, ICNE’s clients, can log in to their account and apply for these projects. This app is reactive based on users’ status. Users can manage their profile, defined projects and job applications in this app.

glassXray

GlassXray is an app that I created from scratch for a doors and windows manufacturing company. The backend is an Express server with RESTful APIs and frontend is a React.js app. The admin can define new products, add photos and drawings to these products. And, they can introduce projects and correlate them to products. In this app everything is flexible, and admin can manage all pages’ content. You can find this project at:
http://salemglassxray.co.uk/
