Behzad Kakavand

Web Developer

London

[JavaScript, React.js, node.js, RESTful APIs, SQL/NoSQL, TDD]
#Work permission: Leave to remain in the UK

I am passionate about coding because it is an art. Creating something, that people interact with, use and work with to help them in their everyday life, is an amazing feeling.
I got interested in coding when I was an experienced sales manager whose innovative approach and interpersonal skills to develop a rapport routinely resulted in the acquisition of new clients.
I dedicated the last 2 years to learn to code and gain more experience in web development.
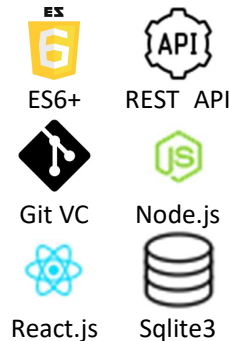

[Recent] Projects

myJobMarket

I created myJobMarket app for "Iranian Community North East" charity. This app helps refugees and newcomers to the UK to find their first job/ project in their new society.

This project, myJobMarket, has two types of users. Group 1 are people who create job adverts on this application. Group 2, ICNE's clients, can log in to their account and apply for these projects. This app is reactive based on users' status. Users can manage their profile, defined projects and job applications in this app.

ES6+   REST API
Git VC   Node.js
React.js   Sqlite3

Goals

YelpCamp is an application where users can introduce campgrounds from all over the world, view them, like them and leave feedback.

Tech

Passport.js   Mango DB
Bootstrap4   Google API

Strategies

YelpCamp

Users can add new campgrounds where they can give the location of a campground, and upload photos of it. By using Google API, this location stored in the database and is accessible at campground's show page. Users can leave comments, rate and or like/dislike these campgrounds.

Experience [Coding]

Jun 19 - Present

During the last couple of months, I took some online courses to improve my knowledge of backend developing and React.js. I also have been working on some personal projects to keep my programming skills sharp.
You can find more about them in my GitHub account.

Trainee Web Developer
CODE YOUR FUTURE

Sep 18 – May 19

This was a great course which gave me the chance to work on a range of projects, designing appealing websites and making new web applications. I was responsible for
- Developing and maintaining the frontend functionality of websites using HTML, CSS, and JavaScript, and React.js.
- Designing prototypes for apps and websites.
- Keeping track of apps by GIT version control.
- Creating server-side of applications using node.js and working with RESTful APIs.

After 5 years in sales and marketing, in 2016, I started looking for a new challenge which would involve using my attention to detail and creativity skills. You can find more about my career as a sales manager at my LinkedIn:
https://www.linkedin.com/in/behzad-kakavand-71181b137/

Feb 16 – Mar 17

UI Designer
FARZIN HOLDING

I managed and guided contractors to ensure timely product launches and meet deadlines. My responsibilities included producing marketing assets for consumer and industry events and promotions, designing mock-ups for website layout and created final web assets, translation of the UI/UX design wireframes to the actual code to produce visual elements of the application.

Educations

Full Stack Web Developing
CODE YOUR FUTUR

Sep 18 – May 19

During the course, I learned a technology stack that helped me build apps from a simple website to a powerful database-driven web application. The course contains core JavaScript, TDD, backend development using node.js and express, and modern frontend framework, React.js.

JavaScript   HTML5   CSS3   TDD

Online Courses

Summer 19

The Web Developer Bootcamp, **udemy.com**, React (Hooks, React Router, Redux), **udemy.com**,
- Building powerful, user-friendly and reactive web apps
- Manipulating the DOM with vanilla JS and translating to jQuery
- Using Node.JS to write server-side codes
- Creating full-stack web applications from scratch

Responsive Design   jQuery   GraphQL   React Hooks + Redux
